hope to find a good home, I call the ones I am keeping "The Three Bears", and they are just about as cuddly as bears and just as mischievous. But we now have them with royalty at our house. They have been named the Duke, Duchess and Queen.

AFTER STUDYING autoaccidents a U. S. Public Health Service study reported that 60 per cent of 177 persons killed would have been saved if they

had been wearing seat belts and had also worn shoulder harnesses. Looks as if we should get ourself all strapped in before driving out of the parking lot.

I READ somewhere that there's nothing wrong in not having anything to say - unless you insist on saying it. So I'll just "not say it" this week.

Will Pollution Cycle Make Lake Erie Into American Dead Sea?

Lake Erie has reached the point of no return, biologists speculate in the Catholic Digest.

As algae and other pollution-spurred organisms die and decay, they nourish fresh growth; now that this self-sustaining life cycle has been set in motion, it cannot be stopped.

Therefore, Erie is as good as dead, just as the Great Salt Lake in Utah is and the Dead Sea in Palestine. It will always be there to look at and for ships to sail on. But it soon will be dead except for the algae and sludge-worms.

There, Erie is as good as dead, just as the Great Salt Lake in Utah is and the Dead Sea in Palestine. It will always be there to look at and for ships to sail on. But it soon will be dead except for the algae and sludge-worms.

Very often the developer would borrow from FHA much more than the entire project cost him, so he could step out with a hundred thousand dollars or more of clear profit before he started, allowing the project to default. He would then go to another city and do it again.

One apartment building of 194 units had not a single tenant months after it was completed. According to the general accounting office there are 575 of these white elephants that have cost the taxpayers \$530 million, also 46,201 homes in default which have cost the taxpayers \$520 million.

This is an almost unbelievable tale of corruption indicating again that Socialism cannot possibly succeed. Human ingenuity is not capable of devising ways to safeguard and account for \$125 billion that government is spending every year. It is beyond the wit of man to provide adequate accounting procedures for that sum of money. Vast waste and corruption is therefore inevitable. When it is the public's money, too many bureaucrats simply do not care, and they promote find itching palms ready to share with them the easy federal money. Big government and corruption, accompanied by track loss that will eventually bankrupt our country, go hand in hand.

The only salvation for the American people is to abandon these Socialistic measures while they still have the strength to do it (if they do), before it is too late. Our fathers bequeathed to us a constitutional government of very limited powers. If we can recover it, we can remain free and self-governing. If not, an authoritarian regime of slavery lies ahead.

YOUR Health

"Your Health" is presented by your physician as a health service of The Medical Association of the State of Alabama.

The physician looked into the patient's eye, and the patient's eye looked right back at him and told him things. Eye examination is a quick and valuable method of determining the general condition of a person's arterial system. Nowhere else in the body are blood vessels and changes in the vascular system seen to better advantage than in the eye.

Observations of the blood vessels in the retina of the eye furnish information said to be better than any offered by other physical or laboratory data. Such examination

of the eye is done with an ophthalmoscope. An ophthalmoscope is a perforated mirror designed to throw light into the interior of the eye and allow some of the light returning from the patient's eye to enter the eye of the doctor. This instrument makes it possible for physicians to study the inner surface of a patient's eye and note changes in the optic nerve and the blood vessels within the eye.

Not only are the earliest signs of hardening of the arteries detectable by ophthalmoscopy, but retinal changes also can be observed that indicate high blood pressure, diabetes, nephritis, brain tumor, and tuberculous meningitis. The ancient Greek, Arabian, and Roman surgeons operated on cataracts of the eye, and it was only about 100 years ago that the ophthalmoscope was devised. Herman von Helmholtz, at the age of 26, designed the ophthalmoscope. Many physicians use this instrument routinely in examinations.

GOOD YEAR

The marvels of the Space Age come vividly alive in the colorful science exhibits at Huntsville's Space Orientation Center. America's largest space science display, the Center shows Saturn rockets, a planetarium, and the actual firing panel used to launch Explorer 1.

Films, art, photography and authentic space flight hardware help visitors understand America's race into space. The planetarium, a scale model of the solar system, dramatizes man's goal -- finding out what's out there among the planets and their satellites.

Tabbies, the cats, are someday take man to the moon, the Saturn rockets draw top billing at this Redstone Arsenal Space Center. Actual Saturn unit and various models tell the Saturn story.

Everywhere about the Center are reminders of space walks and America's first space tourists, monkeys Able and Baker, who took off into space in a Jupiter nosecone in 1959.

The firing panel used to launch Alan Shepard into space as well as photographs of our planet made when his Mercury spacecraft was 100 miles above the earth are also shown.

Some exhibits depict the experiments which solved the reentry-heat problem, making it possible for spacecraft nosecones to survive temperatures of 5000 degrees.

The Space Orientation Center is the showcase of the George C. Marshall Flight Center. This NASA agency now employs 7,500 people and provides jobs for thousands of other men and women working in allied industries.

The Marshall Center and other space-science projects have made Huntsville the fastest growing city in the South. The city had less than 17,000 in 1950. Today Huntsville's

population has soared past 150,000.

Last year more than 200,000 people visited the space center. This year the crowds grew larger, ranging up to 30,000 a month. Travel authorities predict that the Space Science Museum, soon to include all current exhibits

plus many new displays from NASA and the U. S. Army, will draw a million visitors a year.

There's no better place to survey man's exciting probe into space than "Rocket City, U. S. A.," home of the Space Orientation Center.

KINSTON NEWS

By Mrs. J. H. Foster

Mr. and Mrs. Jim Milford and two children, of Montgomery, spent Sunday with Mr. and Mrs. W. Hare.

Mrs. Charles Hare and children, of Jackson, Mississippi, visited her sister, Mrs. H. E. Bess and family last week. Call Hare remained for a longer visit.

Mr. and Mrs. T. J. Smith and Mr. and Mrs. Sidney Holley attended homecoming at Highfalls, near Hartford, Sunday.

Visiting the H. E. Bess home during the weekend were: Mr. and Mrs. Ed Montgomery, spent Sunday with Mr. and Mrs. W. Hare.

Mrs. Mary Flowers and Christopher met her husband in Montgomery last Sunday, and they returned to Atlanta, where they have recently moved.

Miss Patricia Thorne, of Phenix City, is visiting Mr. and Mrs. James Gleason and family and her grandparents, Mr. and Mrs. Roy Thorne.

Mr. and Mrs. Sylvia Harrison and children, of Slocumb, visited her parents, Mr. and Mrs. Clayton Gromes, Sunday.

Mr. and Mrs. Foye Anderson and Billy spent the weekend with her sister and brother-in-law, Mr. and Mrs. J. E. Dennings in Rome, Georgia.

Mrs. Minnie Johnson and Mr. Maud Bowden, who

are visiting Mr. and Mrs. W. J. Donaldson, Mr. and Mrs. David Bates and son, of Montgomery, Alabama, and Mrs. Clara Stephens and Kay Stephens, of Andalusia, visited Mrs. H. H. Bradberry and the M. C. Frees, Sunday.

Mrs. Paul Martin visited Mrs. Frank Thompson in Slocumb, Saturday. Her aunt, Mrs. Oliver Daniel, of Phenix City came home with her and will remain for several days. Oliver Martin and Mrs. Claude Perry Sunday afternoon.

Mr. and Mrs. Lester Stephens joined Mr. and Mrs. Clinton Stephens and Lamar, of Crestview, and spent the weekend at Sealey Springs, near Cottonwood.

Mrs. Orville Pierce is visiting relatives this week at Blue Springs.

Mrs. Bonnie Thorne has returned from the hospital and is recuperating at the home of her brother, Will Weeks.

Mr. and Mrs. Sam Stinson, of Montgomery, spent Sunday with her parents, Mr. and Mrs. W. Hare.

Mr. and Mrs. Earl Phillips and family, of Mobile, spent the weekend with Mr. and Mrs. Ocie Phillips.

Mr. and Mrs. Jack Mathews and family moved their trailer from Fort Polk, Louisiana, into the yard of her parents, Mr. and Mrs. Ocie Phillips. Mr. Mathews will leave soon for overseas duty.

Misses Susie Mae and Nell Williams and Barney Williams, of Birmingham, spent last week with their sister, Mrs. Fletcher Mason, Mr. Mason and G. W. Clark.

Mr. and Mrs. Wallace Jackson and children, of Indian Town, spent

night with Mr. and Mrs. Joseph Saunders and Pat.

Mr. and Mrs. Perry Dyess and Yvonne returned to their home in Jacksonville, Florida, last Friday after visiting Mr. and Mrs. Dewey Adams and other relatives.

Miss Gale Smith was the weekend guest of Miss Sheila Canley.

Mrs. J. L. Kimbro, Miss Libby Kimbro and Miss Joan Stephens spent the weekend with relatives in Birmingham.

Mr. and Mrs. Clinton Stephens, of Crestview, Florida, visited Mr. and Mrs. Lester Stephens, Friday.

Mr. and Mrs. Julian McCrany, Larry, Garry, Sharon, Kay and Mark, of Pascagoula, Mississippi, are visiting Mr. and Mrs. N. W. Rhoades.

Mr. and Mrs. Raymond Surdiant, of Valparaiso, spent the weekend with Mr. and Mrs. M. C. Free.

Mr. and Mrs. W. J. Donaldson, Mr. and Mrs. David Bates and son, of Montgomery, Alabama, and Mrs. Clara Stephens and Kay Stephens, of Andalusia, visited Mrs. H. H. Bradberry and the M. C. Frees, Sunday.

Mrs. Paul Martin visited Mrs. Frank Thompson in Slocumb, Saturday. Her aunt, Mrs. Oliver Daniel, of Phenix City came home with her and will remain for several days. Oliver Martin and Mrs. Claude Perry Sunday afternoon.

Mr. and Mrs. Lester Stephens joined Mr. and Mrs. Clinton Stephens and Lamar, of Crestview, and spent the weekend at Sealey Springs, near Cottonwood.

Mrs. Orville Pierce is visiting relatives this week at Blue Springs.

Mrs. Bonnie Thorne has returned from the hospital and is recuperating at the home of her brother, Will Weeks.

FARM NEWS

By Tom Casaday, County Extension Chairman

INSECTICIDES

We are experiencing a job on this, because cows

seen regularly makes con-

trol much easier. However,

Wiregrass counties of

there are so many good

South Alabama. This

products on the market

residue is showing up in

meat. I mention this to

point out the importance

of using insecticides ac-

cording to instructions on

the bag. For example, in

formation on this contact

previous years many of

our farmers would use

cotton insecticides on live-

stock simply because they

would control flies and

other pests of livestock

with not much thought of

the residue showing up in

the meat. Be sure to follow

instructions on the con-

tainer.

POND MANAGEMENT

Earl F. Kenamer, our

Fish and Wildlife Special-

ist in Auburn, points out

that September is the month

to drain old ponds and to

place fish for restocking.

As soon as a pond has

been emptied, close the

drain valve and poison with

rotenone. For complete in-

formation on draining and

poisoning ponds, get in

contact with us at our

Enterprise or Elba office.

Incidentally, this is the

season to make arrange-

ments for building new fish

ponds. Contractors prefer

key to a good garden is

pond building during the

periods that are normally

dry. Build as large a pond

as you can, and make it

rain that usually comes

in early September. We

have a new booklet entitled

"Good Gardens" which we</

"Just 10 years ago this month, on August 1, 1956, the social security law was broadened to provide monthly cash benefits to totally disabled workers between the ages of 50 and 65." Mr. Harry N. Scott, district manager of social security in Dothan, said recently.

"From that beginning, just a decade ago, the social security disability program has steadily grown and developed. In 1958, Congress made it possible to pay benefits to dependents of disabled workers exactly the same as to those of retired workers. The 1960 amendments removed age 50 as the earliest age that disability insurance benefits could be paid, with the Congress recognizing that the needs of a younger disabled worker could be as great if not greater than those of an older worker. In 1965, the law was changed to eliminate the requirement that the disability be of a kind that could be expected to continue indefinitely and substituted the qualification that the disability must have lasted or be expected to last at least 12 months," he said.

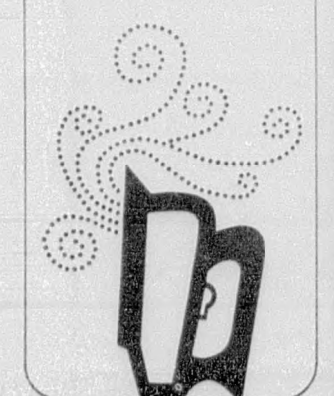

Another change in the law in 1965 provides that if a worker who has applied for reduced retirement benefits between the ages of 62 and 65 becomes disabled, he may apply for the higher disability benefits. Previously, this was impossible.

The Social Security Administration has always been interested in the rehabilitation of disabled workers. Built into the disability program has been a requirement that all applicants for benefits should be referred to the State's vocational rehabilitation agency for consideration for services that might restore them to a productive role in the community.

Under the new law, funds are being advanced out of the Federal disability insurance trust fund to help the State agencies provide these services. This should benefit everybody concerned. The disabled themselves, who might be able once again to go back to their old jobs or be placed in employment within the range of their capabilities, would certainly be benefited. The communities would profit by the return to work of one of their residents. And the social security disability insurance trust fund would be safeguarded against losses through payments to people who could be brought back to an active career through special therapy and retraining.

A living example of the growth and development of the social security disability program is Marlin Enders, a victim of a 1965 coal mine accident in Tremont, Pennsylvania, who in February of this year became the millionth disability beneficiary on the

HisssssBoo to ironing. Let someone else do it. Look under LAUNDRIES in the YELLOW PAGES. In the YELLOW PAGES, where your fingers do the walking.

"Your Health" is presented by your physician as a health service of The Medical Association of the State of Alabama.

THE COUGH

Cough is a protective mechanism. The chief cause of cough is an attack on the body to rid itself of irritating foreign matter. There are countless cough suppressants on the market, and according to medical authorities, when the cough symptom

is suppressed, many bronchogenic cancers, heart disorders, and cases of bronchiectasis may go unrecognized until they have become serious problems. The proper treatment of cough calls for correct diagnosis and therapy which will remove the cause of the cough. The coughing in the throat that occurs just before people cough is the referred symptom of a foreign body in the tracheobronchial tree. People with dry cough usually have accumulation of mucus in the tracheobronchial tree coughed up in such small amounts that the person is not conscious of the presence of sputum. Most of the cough syrups are designed to relieve the tickling in the throat which,

of course, has nothing to do with the cause of the cough. Probably the most common cause of cough is the common cold for which there is no known cure although antibiotics often prevent possible complications. Time alone will take the care of a common cold and usually the cough will disappear in a few days of its own accord. Another common cause of cough is smoking. Smoke is an irritant which causes an excessive secretion of mucus. This condition can be helped by thinning the mucus with an expectorant, and of course the way to stop such coughing would be to stop smoking. Coughing itself often induces more coughing, and the act of coughing may be
